

**Update: Kaplan's SAT Subject Test: Biology E/M,
2005–2006 Edition**

Please note the following correction. Thanks to our readers for their input.

Page	Corrections
page 44, Diagnostic Test, Questions 72–75	<p>The following figure should appear as answer option C.</p>  <p>The diagram shows a central carbon atom bonded to four groups: an amino group (NH₂), a hydrogen atom (H), a variable group (R), and a carboxylic acid group (COOH). The amino group is enclosed in a dashed box and labeled "amino group". The carboxylic acid group is also enclosed in a dashed box and labeled "carboxylic (acid) group".</p>
